Attachments: Wind rose near Solvay.pdf

John and Haile,

I think this might be it.

Andy

Hi Andy L.,

Unfortunately, I failed to tell Haile that NJDEP has shared a wind rose with us from Philly airport. To remedy this, I just went looking for the wind rose. Unfortunately all my wind rose images were snipped from the original at low resolution. Do you happen to have access to the original wind rose that NJDEP sent us that you could forward to Haile?

John

Good morning John,

I will add the airport and wind rose to the maps. When did you collect the soil data?

Best,

Haile

Subject: Another easy map?

Hi Haile,

I have another ask. Would you mind preparing a map showing the soil sample locations and numbers, Solvay, and Chemours?

Also, since the sample transect orientations are based on the wind rose and the wind rose is from Philadelphia Airport (right across the river from Solvay) maybe we ought to include the wind rose and location of the Philly airport? What do you think???

So you know what I am hoping for all your great efforts, the journal allows a maximum of six figures/tables in their papers. I am writing the manuscript with your maps being two of the six paper figures; Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) still hope to have a manuscript and SM drafted the end of this week or next.

I will have EPA email turned off most of the day to minimize writing interruptions. Feel free to text me if you need to communicate; Ex. 6 Personal Privacy (PP)

Thanks,
John
